SYMBOLS

The following are the only symbols used for the purposes indicated below:

- (D)** - Delete or Discontinue
- (I)** - Change Resulting in an Increase to a Customer's Bill
- (M)** - Moved from another Tariff Location
- (N)** - New
- (R)** - Change Resulting in a Reduction to a Customer's Bill
- (T)** - Change in Text or Regulation but no Change in Rate or Charge.

When changes are made in any tariff sheet, a revised sheet will be issued canceling the tariff sheet affected. Changes will be identified on the revised sheet(s) through the use of the above mentioned symbols.

TARIFF FORMAT

- A. Sheet Numbering** - Sheet numbers appear in the upper right corner of the page. Sheets are numbered sequentially. However, new sheets are occasionally added to the tariff. When a new sheet is added between sheets already in effect, a decimal is added. For example, a new sheet added between sheets 14 and 15 would be 14.1.
- B. Sheet Revision Numbers** - Revision numbers also appear in the upper right corner of each page. These numbers are used to determine the most current sheet version on file with the Commission. For example, the 4th revised Sheet 14 cancels the 3rd revised Sheet 14. Because of various suspension periods, deferrals, etc. the Commission follows in their tariff approval process, the most current sheet number on file with the Commission is not always the tariff pages in effect. Consult the check sheet for sheet currently in effect.
- C. Paragraph Numbering Sequence** - There are seven levels of paragraph coding. Each level of coding is subservient to its next higher level:
- 2
 - 2.1
 - 2.1.1
 - 2.1.1(A)
 - 2.1.1(A)(1)
 - 2.1.1(A)(1)(a)
 - 2.1.1(A)(1)(a)(I)
- D. Check Sheets** - When a tariff filing is made with the Mississippi Commission an updated check sheet accompanies the tariff filing. The check sheet lists the sheets contained in the tariff, with a cross reference to the current revision number. When new pages are added, the check sheet is changed to reflect the revision. All revisions made in a given filing are designated by an asterisk (*). There will be no other symbols used on the check sheet if these are the only changes made to it (i.e., the format, etc. remains the same, just revised revision levels on some pages). The tariff user should refer to the latest check sheet to find out if a particular sheet is the most current on file with the Commission.

SECTION 3.0 - DESCRIPTION OF SERVICE AND RATES, (CONT'D.)

3.3 Calculation of Distance

For services which are distance sensitive, usage charges are based on the airline distance between the serving wire center locations associated with the originating and terminating points of the call.

The distance between the originating and terminating points is calculated by using the "V" and "H" coordinates of the serving wire centers as defined by Telcordia, in the following manner:

- Step 1:** Obtain the "V" and "H" coordinates for the serving wire center of the Customer's switch and the destination point.
- Step 2:** Obtain the difference between the "V" coordinates of each of the Rate Centers. Obtain the Difference between the "H" coordinates.
- Step 3:** Square the differences obtained in Step 2.
- Step 4:** Add the squares of the "V" difference and "H" difference obtained in Step 3.
- Step 5:** Divide the sum of the square obtained in Step 4 by ten (10). Round to the next higher whole number if any fraction results from the division.
- Step 6:** Obtain the square root of the whole number obtained in Step 5. Round to the next higher whole number if any fraction is obtained. This is the distance between the originating and terminating serving wire centers of the call.

Formula:

$$\sqrt{\frac{|V_1 - V_2|^2 + |H_1 - H_2|^2}{10}}$$

7.17 AmeriVision Debit Card Service

The AmeriVision Debit Card allows customers to pay a fixed dollar amount in advance for long distance calling over AmeriVision's network. Customers use an "800" number for access from touch tone phones. Customers can place domestic and international direct dial calls using the service. Cards are decremented for each minute or fractional minute of use as set forth below. As calls are placed, charges for the call are deducted on a real-time basis until the full amount of the card is exhausted. Customers will be notified in advance of the exhaustion of the card. An expiration date, if applicable, is printed on the card. The rates paid by the customer until the card is exhausted are the rates in effect at the time the card is purchased. Debit Card accounts may be replenished at the rates specified for replenished cards.

The following types of calls may not be completed using the AmeriVision Debit Card:

- * calls to 700, 800, and 900 numbers
- * calls to directory assistance
- * operator assisted calls
- * conference calls
- * calls requiring time and/or charges

The AmeriVision Debit Card is available twenty-four hours a day, seven days a week. The cards will be offered to customers on a first serve basis and may be offered in conjunction with other AmeriVision products.

An AmeriVision Debit Card account is established upon receipt of payment by the Company. When an account is established, the Company will assign an Account Code/Authorization Code to the account. The Company reserves the right to determine the acceptable types of payment.

Service is provided and each account is debited at the following rate. Fractional minute calls are rounded up to the nearest full minute:

Card Type 1:	\$0.30 per minute
Card Type 2:	\$0.35 per minute
Card Type 3:	\$0.20 per minute
